

Company **Legolas Invest Limited**

Industry **Lotteries and Gaming**

Website **www.legolas.bet**

Team **UX Designer, 3x UI Designer, 2x Trotting Analyst**

My Role **Research, Design Sprint Facilitator, Wireframes**

Context

The sportsbook product has been designed to display 5 main sports, adding the entire selection of sports provided by the provider, highlighted the urgency of navigation only for sports.

Challenge

Run all the relevant analysis and define a solution for the navigation in the sportsbook. The solution must fit 1 sprint (2 weeks) in terms of development time.

Solution

The solution presented is new navigation for sports which has sticky functionality, search capabilities and a switch for odds type. The navigation is very tiny when idle, only 35px height, it doubles the size when searching or scrolling the sports icons.
