

Curriculum Vitae

Imre Guaglianone

Experience Designer

📞 +39 351 7675459

✉ imre.guaglianone@gmail.com

A successful experience isn't handed to users — it happens when people are empowered to interact with systems on their own terms. That principle has guided my 12+ years designing products and services across digital interfaces and real-world touchpoints.

I'm Imre Guaglianone, a design lead who thrives at the intersection of behavioral design, systems thinking, and product execution. I don't just sketch flows; I align teams, data, and technology to remove friction and let outcomes speak. At Instacoins, I overhauled a complex signup flow, driving a +38% YoY increase in registrations and cutting KYC completion time to under 4 days for 90% of users. For Betika, I redesigned the platform to run seamlessly on feature phones in Africa, where bandwidth is scarce and data costs high, ensuring accessibility and boosting retention in their largest market.

My experience spans iGaming, IoT, Fintech, and SaaS, along with emerging markets in Africa, India, and South America. These contexts taught me to design under real-world constraints: low bandwidth, cultural diversity, compliance hurdles. What stays constant is my data-driven approach, using evidence, not assumptions, to guide decisions.

Beyond delivery, I care about scaling design maturity. I've built ResearchOps and DesignOps practices that cut time-to-insight and accelerated iteration cycles. I mentor designers and product teams, inspired by Google's Oxygen Program, and I contribute actively to the Interaction Design Foundation and UXPA communities.

I would bring to your team not only the ability to design seamless user experiences, but also the leadership and operational rigor to scale them sustainably. I'd be excited to discuss how my skills and results can support your company's growth.

Work Experiences

Dec 2024 - Current
Fred
Remote
AI - Data Analytics

Founder and CEO

- **Developed and executed the company strategy and product vision for Fred**, translating market positioning and customer needs into a prioritized roadmap across research creation, analysis, collaboration, and reporting.
- **Led end-to-end product delivery as CEO and Founder**, aligning design, engineering, and go-to-market decisions, and defining success metrics to drive iteration speed, retention, and activation.
- **Owned fundraising preparation and execution**, including investor targeting, narrative development, pitch deck creation, data room readiness, and KPI storytelling to support capital-raising conversations and partnership opportunities.
- **Represented the company in pitch settings and public forums**, delivering product demos and strategic narratives to investors, accelerators, and industry audiences, and iterating positioning based on market feedback and objections.
- **Built the product foundation for an all-in-one AI Native UXR platform**, integrating multiple research methods (card sorting, first click, tree test, unmoderated usability testing, surveys, preference tests, 5-second tests) into a coherent workflow and shared information architecture.
- **Established operational rigor across ProductOps and DesignOps**, defining decision frameworks, documentation standards, and delivery rituals to reduce ambiguity, improve throughput, and increase predictability.
- **Owned platform-level UX quality and interaction design standards**, ensuring consistent patterns, accessible UI conventions, and scalable component usage aligned with the engineering stack.
- **Designed the product's reporting and insights layer**, shaping how raw study data becomes synthesis, behavioral analysis, and client-ready outputs through a report builder and structured insight workflows.
- **Directed the development of "User Sphere"** for real-time and replay-based session analysis, defining the experience for gaze tracking, session playback, and heatmap overlays to elevate qualitative analysis and stakeholder communication.
- **Managed product risk and compliance constraints**, including data hosting in Europe and privacy-by-design considerations, ensuring the platform architecture supports enterprise-grade requirements.

Mar 2021 - Sep 2024

Instacoins Group

Remote - Contract

Fintech - Cryptocurrencies

Head of User Experience

- **Developed and executed a comprehensive UX strategy for a 5-product portfolio**, aligning design initiatives with business growth and regulatory compliance.
- **Scaled UX from founder-led to a 14-person organization** across three companies in the group. Built teams from scratch, established roles, and fostered cross-functional collaboration with product and engineering.
- **Implemented governance and workflow efficiencies** (design principles, Figma ⇌ Storybook ⇌ Chromatic pipeline), reducing handoff-to-merge time and cutting QA UI defects.
- Designed and maintained a **Group-wide Design System** based on **Tailwind CSS** with **WCAG 2.1 AA** coverage, accelerating delivery and ensuring accessibility.
- Conducted 80+ usability studies across multiple products, directly informing roadmap decisions and improving conversion and retention metrics.
- Established **ResearchOps** and **DesignOps** practices, cutting time-to-insight and scaling study throughput.
- Promoted a **design-driven culture** by running workshops, embedding designers in squads, and creating shared rituals that improved delivery predictability.

Jan 2021 - Mar 2021

PartnerPage.io

Remote - Contract

SaaS

Product Designer - Consultant

- Owned **PLG growth design strategy** across discovery → activation → retention, using **JTBD** to prioritize high-leverage jobs; roadmap items backed by research to **+80%** and activation **+21%**.
- Ran in-product experiments (onboarding, empty states, partner directory flows); time-to-value **-30%**, Product-Qualified Leads (PQLs) **+36%**, and day-7 retention **+12pp**.
- Conducted deep UX research (JTBD interviews, usability testing, analytics) that resolved top 5 friction points and cut drop-offs at onboarding step 2 by **35%**.
- Led heuristic evaluation across core workflows; shipped 17 design fixes that **reduced support tickets per 1k MAU by 28%**.
- Delivered Design System accessibility audit (WCAG 2.1 AA) with component-level guidance + CI checks; critical a11y issues/release decreased from 10+ to <2 and contrast/keyboard coverage reached 90%.
- Upskilled the product design team through accessibility and experiment-design training; established a cadence of 2–3 experiments/month and published JTBD + PLG playbooks to sustain velocity.

Dec 2019 - Jan 2021

Tembeza International SLU

Remote

iGaming

CX/UX Manager

- **Owned CX/UX strategy for web and feature phones across high-volume African markets;** signup → first-bet activation increased by 22% after onboarding and KYC simplification.
- **Integrated LEAN design into Agile delivery** (discovery sprints, DoR/DoD, tokens); handoff → deploy cycle time decreased by 35% and on-time releases increased by 18pp.
- **Optimized for constrained devices & networks** (payload budgets, image/CDN strategy, offline states); time-to-interactive down by 82%, data consumed/session down by 60%, crash rate reduced by 46% on feature phones.
- **Reduced friction in the bet-placement funnel** (streamlined steps, clearer errors, wallet UX); checkout drop-off at step 3 (phone link payment) decreased by 28%, **repeat bet rate raised by 18%**.
- Increased product profitability via UX (JTBD-led priorities, promo tests, guardrails); **ARPU up by 9%** with no uplift in refund/chargeback rate.
- Established a CX/UX operating system (research repo, heuristic cadence, a11y gates, visual regression in CI); support tickets/1k MAU decreased of 25%.

Apr. 2019 - Dec. 2019

Tembeza International SLU

Remote

iGaming

Lead UX Designer

- Captured business objectives through Stakeholder Interviews, ensuring alignment of UX strategy with company goals.
- Planned and conducted User Research to define Personas, providing a data-driven foundation for product development.
- **Evaluated the organization's UX Maturity**, identifying areas for improvement and setting a roadmap for growth.
- **Planned and designed a unified Design System**, ensuring consistency and scalability across all distribution channels.
- **Streamlined the product design** across web and mobile platforms, maximizing efficiency and delivering a seamless user experience across channels.
- **Reduced market risks** by optimizing the design process for introducing new products, services, and features, leading to smoother launches.
- Spearheaded the design of new UI for web and mobile products, resulting in **increased business profitability** and **enhanced user engagement**.
- **Advocated for a holistic consumer experience**, developing customer plans that fused user needs with business strategy.

Oct. 2018 - Feb. 2019

Northern Gas and Power
Contract
IoT | SaaS

UX Developer

- Led the setup, execution, and reporting for qualitative and quantitative UX research, providing actionable insights that informed product development and user engagement strategies.
- Designed and built comprehensive data visualization widgets to simplify smart utility adoption for new users, addressing key data presentation challenges.
- Collaborated with the business to define and conceptualize design solutions for the next generation of IoT sensor dashboards, aligning with future product goals and user needs.
- Designed the User Experience for ClearVue Alpha and Beta products, ensuring a seamless and intuitive interface that improved user interaction with complex IoT data.

Nov. 2016 - Oct. 2018

Legolas.bet
iGaming

Head of UX and Development

- Led the design and development efforts for Version 1 and 2 of the platform, steering an agile design team to deliver user-centered solutions across multiple products.
- Applied Lean UX and Double Diamond frameworks to reduce stress and workload, optimizing design processes and improving efficiency at different product stages.
- Supervised and guided an agile development team, successfully launching three verticals—Pool Betting, Sportsbook, and Casino—from scratch within one year, setting an industry record for speed to market.
- Built and managed a remote design team of 15, ensuring seamless collaboration and consistent design delivery.
- Established and led a remote development team of 40, driving cross-functional teamwork and meeting aggressive product launch timelines.

Technical Skills, Frameworks & Tools

Strategic Leadership & Operations

- Built and scaled UX organizations across three companies in the Instacoins Group, embedding ResearchOps and DesignOps practices.
- Cross-company design governance: design systems, semantic tokens, and component libraries integrated with CI/CD pipelines.
- Product strategy alignment: Product-Led Growth (PLG), Jobs-to-Be-Done, KPI mapping, and regulatory UX (KYC/AML, fintech compliance).

Advanced Research & Analysis

- Mixed-methods research: ethnographic fieldwork, surveys, card sorting, unmoderated/remote usability testing.
- Behavioral economics and decision architecture applied to product adoption and retention.
- Data-driven iteration: analytics, A/B testing, funnel optimization, and retention/engagement metrics across iGaming, fintech, SaaS, and emerging markets.

Frameworks & Methodologies

- Design Thinking, Double Diamond, User-Centered Design, Service Design, Systems Experience Design, Circular Design.
- Agile/SCRUM at scale, Google Design Sprint, Design Sprint 2.0, Lego Serious Play.

Collaboration & Delivery

- **Design & handoff:** Figma, Storybook, Tailwind CSS, Jira, Confluence.
- **Front-end literacy:** HTML/CSS, JavaScript (ESNext), VueJS.
- Workshop facilitation, cross-functional enablement, and stakeholder communication in distributed teams.

Trainings & Certifications

Behavioral Economics and Design | Irrational Labs (2024)

Ethnographic Research | Frank Spiller @ Dynamic Experience (2021)

Inclusive Design | Frank Spiller @ Dynamic Experience (2021)

Service Design | Frank Spiller @ Dynamic Experience (2021)

Gamification: Addictive User Experiences | Interaction Design Foundation (2020)

UX Ethic | Frank Spiller @ Dynamic Experience (2020)

Design Sprint Facilitator | Jonathan Courtney @ AJ&Smart (2020)

UX Management: Strategy and Tactics | Interaction Design Foundation (2020)

Human Computer Interaction: HCI | Interaction Design Foundation (2018)

UX Designer and Researcher | Interaction Design Foundation (2016)

Gestalt Psychology | University of Bologna (2016)

Professional Web Graphic Designer | DIEFFE (2008)

BSc (Hons), Pure Chemistry and Matter Chemistry | University of Bologna (2006)

Hobbies

Gaming (co-op & strategy): Helldivers 2, Dota 2, Diablo IV, Rome: Total War

Outdoors: Walking & camping for reset and perspective

Tinkering: Hands-on with tech; I like understanding how things work

Languages

Italian — **Native (C2)**

English — **Fluent (C1):** technical documentation, stakeholder comms, public speaking

Spanish — **Basic (A2):** reading and simple professional exchanges
